Criterion	1 Beginning	2 Developing	3 Secure	4 Extending
Audience and message 1.4 / 4.4	The audience or message is difficult to identify.	A recognizable message only partly fits the audience.	A clear message and action fit the named audience and brief.	Testing evidence shows precise audience control and purposeful revision.
Design principles 4.1	Elements compete and relationships appear accidental.	Some alignment, hierarchy and proximity help organization.	Alignment, contrast, hierarchy and spacing create a clear reading path.	The layout uses restraint and every relationship supports the message.
Colour and typography 4.1 / 4.3	Colour or type choices reduce readability or consistency.	A palette and type pair exist but roles remain uneven.	A limited legible palette and repeatable type roles communicate the brand voice.	Colour and type remain distinctive, accessible and flexible across formats.
Photoshop craft and output 4.4 / 4.5	The file is destructive, disorganized or exported incorrectly.	Basic layers and export settings work with minor issues.	Named editable layers, masks and correct 1080 sRGB export support revision and delivery.	The file structure and output checks anticipate future adaptations.
Process and rationale 1.3 connection	Evidence or reasons are missing.	Evidence shows completion; reasons mainly describe choices.	Checkpoint, source log and rationale connect decisions to the brief.	Evidence shows audience testing, focused iteration and transferable judgement.
